swiss quality.

swiss quality.

We have been present on the Polish market since 1995 ... and it all began more than 100 years ago in Switzerland, when in 1908, in the small town of Gossau, Karl Bubenhofer founded a trading company supplying paints to painting enterprises. Karl Bubenhofer was an entrepreneur but also an artist. He specialized in renovating interiors of sacred objects. Many churches in Switzerland are decorated with wall paintings of his authorship. In 1926, undertaking new challenges, he sold a trading company and founded a paint factory under the KABE Farben brand. From this moment, a new chapter begins in the history of the company...

Over the next years, the company continued to develop dynamically, and skillful adjustment to new challenges and expectations of the market enabled new products to be introduced. Soon, KABE Farben's offer, outside of paints had been enriched with thin-coat renders, industrial and powder paints, and mineral-based top coats and plasters based on potassium water glass. The latter product, developed in 1999, was based on an absolutely innovative recipe, the only one in the world. This way KABE Farben Karl Bubenhofer AG has become a pioneer and leader in the field of mineral technology products, conquering international markets. In Poland, the Company started its activity in 1995 as a Polish-Swiss limited liability partnership of KABE Polska Sp. z o.o. Paints

During the following years of activity on the Polish market, the company has established its position as a leading supplier of products for elevations and interiors, cooperating with distribution Partners and Investors, Architects and Designers. The KABE Paints Poland Poland company is also a significant supplier of products for the conservator market. The list of reference objects includes a number of Polish monuments, including the Palace Museum in Wilanow, Ogiński Palace in Siedlce, Townhouses in Kazimierz Dolny, Jasna Góra Basilica in Czestochowa, Branicki Palace in Bialystok and many others. Swiss origin commits - caring for traditional Swiss values gives a guarantee that KABE Paints products are featured with the highest quality and reliability.

The mission of KABE Paints for years has been: „Delivering modern decorative - protective products so that they always enjoy full approval and trust of our Customers - solidly fulfilling their task for many years ...”
